ABSTRACT

PRIMARY HEADING

EQUATIONS, TABLES AND FIGURES

All forms of equations have to be centered and numbered consecutively with Arabic numerals as they appear in the text of the paper. The equation would be presented as follows:

$$\mathbf{Ma} + \mathbf{C}(\mathbf{x})\mathbf{v} + \mathbf{K}(\mathbf{x})\mathbf{u} = \mathbf{P}(t) \tag{1}$$

Tables and figures must be integrated with the text and numbered consecutively with Arabic numerals in the order in which reference is made to them in the text of the paper. The table or figure caption would be referred to in the text as Table 1 or Fig. 1, respectively, and be presented as follows.

Table 1 The first table in the paper

Table or Figure

REFERENCES

References are to be listed at the end of the paper in the order of the reference, and are referred to in the paper by the numbers in brackets such as [1,2]. Style the reference list according to the

following examples.

(1) Book
1. Hughes, T. J. R., *The Finite Element Method, Linear Static and Dynamic Finite Element Analysis*, Prentice-Hall, Engelwood Cliffs, NJ, 1987.

(2) Paper in a journal
2. Koh, H. M., Lee, H. S. and Haber, R. B., "Dynamic crack propagation analysis using Eulerian-Lagrangian kinematic descriptions", *Computational Mechanics*, Vol. 3, 1988, pp. 141-155.

(3) Chapter in a book
3. Riedel, H., "Nucleation of Creep Cavities/Basic Theories", Chapter 7, *Fracture at High Temperatures*, Springer-Verlag, Berlin, 1987.

(4) Paper in Conference Proceedings
4. Lee, H.S. and Koh, H.M., "A Moving-Grid Finite Element Method for the Prediction of Dynamic Crack Propagation in Brittle Materials", *Proc. of the Second International Conference on Computer Aided Assessment and Control of Localized Damage*, Vol. 2, pp 463-480, Southampton U.K., July 1992.
